Subject: Terwilliger Update

Hello Everyone,

I just wanted to send out one last update before I take some time off. We continue to remove slash and hazard trees within the closure area. Starting Tuesday morning, David Duncan will take over as the IC. We did get snow within the closure through the night. We got about a ¼ inch at Box Canyon, and some of the contractors that are working at higher elevations couldn't make it in. Also, if you scroll down there is a picture of another small slide on the 19 road. It came down through the night and has since been cleared, but this is just an example of some of the dangers that you could encounter. We also continue to have trees come down across the 19 as well.

If you need to go into the closure area, please continue to let us know so that we can track you. I would also recommend being better prepared if you go in. Take extra water and food in case something happens and you can't get out right away. The 500 rd on the East side of the reservoir is also very soft right now and although I haven't driven it lately, I would anticipate it's in pretty bad shape. Please stay off the 500 rd if you can.

Thank you,

Randy Pyle
